REMARKS

REFERENCE

DO NOT CIRCULATE

1. On 3 May 1951, 40 single-engine, low-wing monoplanes with in-line engines and four biplanes were parked on the northern edge of Reinsdorf airfield, just south of a narrow-gauge spur track. There was no flying. Two tank trucks and 18 trucks,

 were seen on the field.

2. The field was about 100 hectares large. There were no hangars or hard surface runway. Three temporary buildings and about 10 to 12 large pyramid-type tents were occupied by an estimated 300 to 400 men. A section of the estate on the southern edge of Reinsdorf was used to park motor vehicles. Air force officers up to the rank of colonel were seen in Reinsdorf. *

25X1A

- * Comment. According to previous observations, the aircraft are IL-10s and belong to the ground attack regiment which was transferred from Koethen to Reinsdorf in early April 1951. It is believed that the regiment will stay in Reinsdorf only during the summer, since the landing field is only serviceable during the dry season. For sketch of landing field, see Annex.
